Remove Bluefox RMVB to X Converter

You can use "uninstall" in the "start menu" or the installed directory. And you can uninstall the software by "Add/Remove program" in "Control Panel".
Buy and Register software

To buy the software

You can goto our website (http://www.bluefoxvideo.com) to buy the software, or you can click "Buy" in the menu of "Help". Then you will get the registration code of the software by email.

To register the softeware

CLick "Enter registration code" in the menu of "Help", and then fill the content of "Register Page" (Registration code will be in your email).
Getting start Converting a video file

1. ## Select the files to be converted;

   There's three ways to add file
   - i. Menu "File" -> "Add file"
   - ii. Toolbar button "Add File"
   - iii. Drag files to the software file list area

2. ## Global Output Setting

   Choose a Profile, that is the format you want to convert, and choose the destination path in "Global Output Setting interface. The detail setting see "Global Output Setting".

3. ## Single task config

   If there were several files to be convert and each of them was going to convert to different format such as a AVI fi file to 3GP or file A to MP4 with bitrate 2M and B to MP4 with bitrate 1M etc., then you can right click each file in th choose "Task info" to setting the task of the selected file. The detail setting of single file, see "Single task info and s

   NOTE: flag "G" means this converting task use Global output setting; and flag "P" means this task use setting.

4. **Start converting**

When all files that to be converted were done configuration, just click "Start" and wait for a while(taken time deper number and file size).
Global Output Setting

In the main interface of the software, there's an area named "Global Output Setting". It's to config the output in three aspects:

1. ## Profile choosing

   You can choose a profile to do the basic output converting config. And all of the video / audio codec parameters is optimized and predigested, the default setting can do good job.

2.

   If you want to do the advanced settings by yourself like video size, bit rate, frame rate, etc. just click "Detail" button after "Profile" drop-down options, you will get the profile detail info window like below:

   So, you can adjust thesr video / audio parameters by yourself. And every option of these parameters was tested and configed well by us to make all this easy to you.

   NOTE: Details of "Screen Crop/Pan", see "Screen Crop / Pan".

3. ## Destination choosing

   Click "Explore" to select the directory that you want the output files be.

   NOTE: The output file's main file name is the same to the source file by default. If you want to change the file name of th output, right click on the file in file list area, and choose "Task Info". Get to know more at "Single task info and setting"

Single task info and setting

If there were several files to be convert and each of them was going to convert to different format such as a AVI file to MP4 and a WMV file to 3GP or each of them was going to convert to different parameter output file such as A to MP4 with bitrate 2M and B to MP4 with bitrate 1M, then you can right click each file in the file list area, and choose "Task info" to setting the task of the single selected file.

In the "Task Info" dialog, you can config the output for one single input file:

1. Choose a profile. If want to do the advanced settings for a profile, click "Detail". See more in "Global output setting"
2. Choose a destination directory and name the output file
3. Set the start time and end time of the input file to be converted.

Task save and load

A tast is what you want do in the software.

When you've selected files into the file list and configed the output, you can use "Save Task" to save a task in your disk, thus you can do the converting later.

- Menu "File" -> "Save Task";
- Toolbar "Save Task".

The task includes of the files path and name and the output config of every file about destination, profile and codec parameters etc.

You can "Load Task" when you have time to do converting, and you will get all files in the file list and all output setting include codec parameters setting.

- Menu "File" -> "Load Task".

Preview and play video files

In the file list area of the software interface, right click a file, you will see a menu, like below:

In the menu, click "play" to preview and play video files with "Bfplayer".

NOTE: Bfplayer is a simple player developed by Bluefox Studio, it's a beta version, and we are still working on it.

In the menu, click "Property" to show the infomation of the file.

File Property

File Name:fighter.wmv
File Path:D:\Temp\test_video\
File Size:4417KB
Duration: 00:04:05.6
BitRate: 147 kb/s
Video:
        Codec :   wmv3
        BitRate: 121 kb/s
        Size   :   320x240 [PAR 0:1 DAR 0:1]
        Frame Rate: 15.00 tb(r)
Audio:
        Codec :   wmav2
        BitRate: 20 kb/s
        Sample Rate: 16000 Hz
        Channel: stereo

Close

Screen Crop / Pan

There are two kind of video by screen scale in the main: Normal Screen and Wide Screen.

Normal Screen generally means 4:3 (width:height), and Wide Screen means 16:9, and there're many other video aspect ratios (e.g 2.35:1, 5:4, 11:9, 15:9, 16:10).

Then there's a problem coming up: what you should do when convert video from different video aspect tatios?

Well, we offer 7 options to do converting like this, you may choose the following crop modes based on your personal preference.

Screen Crop / Pan options	Wide Screen --> Normal Screen	Normal Screen --> Wide Scre
Mode 1: Stretch to fullscreen (image distorted)		
Mode 2: Crop to fullscreen (Pan & Scan)		
Mode 3 (Recommended): Align center with blank (letterbox)		

Mode 4: Align left with blank (for special purpuse)		
Mode 5: Align right with blank (for special purpuse)		
Mode 6: Align top with blank (for special purpuse)		
Mode 7 : Align bottom with blank (for special purpuse)		

Set the start time and end time

If you want to convert a file just for a snippet, then you will need this function.

Here you can convert just a part of a media file by setting the start time and end time.

To do this, right click on the file you want to convert in file list area of the software interface, choose "Task Info", you can see "Task Info" dialog, and you can set the start time and end time of the input file.

See details and screenshot in "Single task info and setting".
